## EXPERIENCE

### Software Engineer » Navigating Cancer — Seattle, WA | July 2012–Present

- Employ test-driven development to design and implement features from database integration to user interface using Ruby, Rails, Rspec, Sass, Haml, and other cutting-edge web technologies
- Work closely with Vice President of Product to iteratively improve user interface and overall web application design for over 400,000 users
- Utilize pair programming to ensure DRY, testable, easily maintainable code in collaboration with colleagues

### Customer Advocate » A Book Apart — Remote | September 2011–July 2012

- Responded to customer support emails for one of the web's most forward-thinking technical book publishers for web designers, upholding the company's extremely high standard for customer service
- Worked with partners to further enhance customer support policies

### Lead Front-End Developer » Study in the USA — Seattle, WA | July 2011–April 2012

- In conjunction with executive leadership, developed a substantial web application redesign to better meet business goals
- Coordinated efforts between design team and back-end developers to ensure consistency between the site's aesthetic and technical aspects
- Conceptualized interaction design and production front-end code for web application with a user base of nearly 500,000 monthly unique visitors, localized in 12 languages

### Web Developer » Freelance — Seattle, WA | January 2007–Present

- Develop custom websites for small business and non-profit clientele
- Manage subcontracted development team to create outstanding user experience

## EDUCATION

### The Seattle School of Theology & Psychology » Seattle, WA

Master of Arts, Counseling Psychology, April 2012.
